

Pure & Clean
Finish

Viralsafe

Comfort and Hygiene

CT NASSAU
Tape, Jacquard And Stretch Ticking

The unique metal-free antiviral solution for your safety

VIRALSAFE is a finishing that reduces viral activity by up to 90%. Via the cross contamination of surfaces, bacteria and viruses can easily be spread and some textiles cannot be washed, only surface cleaned and disinfection is not that easy on fabrics.

With VIRALSAFE we are protected in a more permanent way!

HOW IT DOES WORK

Antimicrobial and viral reducing Technology

The active ingredient is bound to the substrate. It attracts the microorganism to it and mechanically punctures the cell wall.

THE FINISHING:

- Is bound to the product surface
- Is not consumed by micro-organisms
- Will not cause adaptive micro-organisms

EFFECT
DEMONSTRATED
IN 2H

TESTS:

ASTM E-2149

Antimicrobial test for non-migrating technologies from a IAC certified laboratory

NF ISO 18184:2014 and ISO 18184:2019

Determination of antiviral activity of textile products

Benefits

- ✓ Antiviral
- ✓ Antibacterial
- ✓ Reduces skin irritation
- ✓ Can be applied to all type of fabrics

Sustainability

Recyclable and
Biodegradable
(OECD 209/302B)

Washability

Washable and permanent
(even in low temperatures)

Metal-free solution
(no silver) No metal leakage
into the environment
with home laundries
